

## Montana Department of Corrections Offender Tablet Programming Guide

As set forth in DOC 3.3.10, the Department Inmate Communication committee considers any proposed content for tablets that is intended to be used department-wide or requires a determination of whether it must be evidence-based. The Inmate Communications Committee also reviews any preprogrammed content and initiates removal of any inappropriate content.

Facility-specific content that may be approved at the facility level and does not require committee review or approval includes:

- Unit rules
- Procedures
- Announcements

Proposed content that must be reviewed and approved by the committee includes applications for:

- Grievance forms
- Medical or mental health notes
- Visitation notifications
- Educational materials
- Therapeutic materials

If an employee is unsure whether content needs committee approval, the employee may contact any member of the committee so the question may be posed to the committee.

This document is maintained by the Inmate Communications Committee and may change at any time.
