I. PURPOSE

To establish reporting procedures to notify appropriate administrators, next of kin, and local authorities in the event of the death of an inmate.

II. DEFINITIONS

Death – When an individual has sustained either irreversible cessation of circulatory and respiratory functions or irreversible cessation of all functions of the entire brain, including the brainstem. A determination of death must be made by a physician or coroner.

Investigations Bureau – The office that oversees investigations for the Department.

Administrative Review – An assessment of correctional and emergency response actions surrounding an inmate’s death in order to identify areas where facility operations, policies and procedures can be improved.

Clinical mortality review – An assessment of the clinical care provided and the circumstances leading up to a death in order to identify areas of patient care or system policies and procedures that can be improved.

Psychological autopsy – A written reconstruction of an individual’s life with an emphasis on factors that led up to and may have contributed to the individual’s death. This is typically conducted by a psychologist or other qualified mental health professional.

III. PROCEDURE

A. Notifications

1. In the event of inmate death, the nurse or staff in charge must, as soon as possible, but no more than eight hours later, notify the facility health services administrator, the appropriate physician, and the Warden or designee.

2. In the event of inmate death, the Warden, or designee, must notify the Department medical director, the chief of the Investigations Bureau, and local law enforcement officials.

3. The Warden, or designee, will consult with the medical director and decide whether to request a post mortem examination. Unattended deaths and suicides require a post mortem examination.

4. The Warden or designee will immediately notify the Department Director by phone of any inmate death.

B. Progress Notes and Incident Reports
1. Health care staff will complete progress notes as soon as possible, but no later than the end of the shift, citing witnessed facts concerning:
   a. time of expiration;
   b. nature of death;
   c. circumstances surrounding nature of death at that time;
   d. treatment rendered (if any);
   e. persons notified of death; and
   f. whether an autopsy was requested.

2. All staff who witnessed the death will complete incident reports as soon as possible, but no later than the end of the shift.

C. Release of Information

1. Employees must not release information concerning inmate death to outside media, e.g., newspapers, reporters, etc. Employees must refer all such questions to the Warden or MSP Public Information Officer.

D. Report of Inmate Death and Health Record

1. Within 24 hours, the MSP health services administrator, or designee, will complete and forward the report of inmate death and a copy of the inmate’s health record to the Department Clinical Services Division Administrator, and the Department Investigations Bureau Chief.

2. The MSP health services administrator, or designee, will ensure that all health record entries are complete, all pages numbered, and that the original inmate health record is kept in a locked cabinet on-site.

E. Mortality Review

1. The Department Medical Director and/or the Clinical Services Division Administrator or designee will:
   a. coordinate a multi-disciplinary mortality review that includes an administrative review, clinical mortality review, and a psychological autopsy review (if the death was by suicide) within 30 working days of an inmate’s death (see attachment);
   b. notify all the necessary disciplines involved, i.e., legal, medical, mental health, and custody staff, that the review will be conducted to:
      1) determine if there was a pattern of symptoms that may have precipitated an earlier diagnosis and intervention; and
      2) determine whether the events immediately surrounding the death show the appropriate interventions occurred.
   c. When the medical autopsy is completed after the clinical mortality review has occurred, the review is appended with information from the autopsy report;
   d. for expected deaths, a modified death review process, which focuses on the relevant clinical aspects of the death and preceding treatment, may be followed; and
   e. once completed, the clinical mortality review and administrative review results are communicated to the unit health staff involved through the monthly Medical Review Panel.

2. Corrective action identified through the mortality review process is monitored and reviewed as needed through the facility CQI process. (see HS-A-06.0)
3. The medical examiner or coroner will review all inmate deaths and subsequent reports.

IV. CLOSING

Questions concerning this operational procedure will be directed to the Health Services Manager.
