SPECIFICATIONS

Our Residential Furniture is constructed of select hardwood components with quality metal connectors to ensure a strong and durable interchangeable furniture system that Montana colleges and residential institutions have trusted for years.

- Construction process uses a 32mm boring system to ensure uniformity when joining components
- Bolt connectors and barrel nuts provide metal-to-metal joint connections, eliminating wear and damage to the wood
- Configuration provides greater strength, flexibility, and a lighter product than one composed of chipboard, particleboard or medium density fiberboard
- Adjustable glides allow for leveling on uneven floors
